

Policy for Environment and Quality

We focus our development on smart, environmental friendly and sustainable products, solutions and services with high quality. In doing so we meet the outside world's and our customer's expectations.

For LK this means:

- that the employees have good knowledge of and commitment to environmental and quality issues
- that we adapt and continually improve products and services to meet the demands, needs and wishes of the stakeholders
- that we constantly work to prevent and reduce the negative environmental impact to protect our environment
- that we meet the binding requirements for which the business is affected
- that we work on continuous improvements and clear objectives for environmental and quality issues in order to improve performance.

In order to achieve our goals and meet the outside world's expectations, our employees are our primary asset. Together we create a safe and secure workplace that provide the basis for a sustainable business.

Michael Söderberg
CEO, LK Systems AB
